

# Mock Exam Voucher AWS CCP

Akan dipilih 5 orang dengan nilai rata-rata tertinggi dari Mock Exam Post-Test dan Mock Exam Voucher ini untuk mendapatkan **voucher diskon 100%** ujian AWS CCP.

Soal disusun menyerupai ujian CLF-C01 AWS Certified Cloud Practitioner, anda diberikan waktu 120 menit untuk mengerjakan 65 soal.

## Identity

Masukan identitas anda dengan benar, untuk menghindari kesalahan dalam penilaian

1. Name \*

2. Email yang terdaftar pada MSIB Kampus Merdeka \*

### 3. Homeroom Coach \*

- ☐ M. Andrian Maulana
- ☐ Fio Faberio
- ☐ Abdiel Wilyar Goni
- ☒ M. Rifal Alfarizy
- ☐ Mahaputra Ilham Awal
- ☐ Ibnu Mansyur Hamdani
- ☐ Adi Syahadi

### 4. Class \*

- ☐ LEX
- ☐ GARUDA
- ☐ LINAC
- ☐ LAMBDA
- ☐ ANDALUSIA
- ☐ GEORGE FAVALORO
- ☒ AL-JAZARI

## Question

5. Chairros Academy students wants to use AWS to test their new mobile app in a coordinated manner on multiple devices simultaneously for final project. Which of the following services will assist in expediting the process?(1 Point)

- ☐ AWS Security Bulletin
- ☐ AWS Ground Station
- ☒ AWS Device Farm
- ☐ Amazon QuickSight

6. If you need to launch a customized self-hosted database that requires a nightly scheduled shutdown to save money, which service should you use?(1 Point)

- ☒ Amazon EC2 instance with an EBS volume
- ☐ Amazon DynamoDB
- ☐ Amazon EC2 instance with an Instance Store volume
- ☐ Amazon Redshift

7. A company has web servers running on Amazon EC2 instances that connect to a RESTful API hosted on-premises. What type of architecture does the company employ?(1 Point)

- ☐ Serverless Architecture
- ☐ Software as a Service (SaaS)
- ☒ Hybrid Architecture
- ☐ Platform as a Service (PaaS)

8. A company must download compliance-related documents from AWS, such as ISO certifications, Payment Card Industry (PCI) reports, and Service Organization Control (SOC) reports, in order to conduct a security audit. Where can they retrieve these files?(1 Point)

- ☐ AWS Certificate Manager
- ☐ AWS Trusted Advisor
- ☐ AWS CloudTrail
- ☒ AWS Artifact

9. Which of the following channels offers paid engagements in multiple specialty practice areas to assist you in achieving specific business outcomes related to enterprise cloud adoption?(1 Point)

- ☐ AWS Enterprise Support
- ☐ AWS Technical Account Manager
- ☐ Concierge Support
- ☒ AWS Professional Services

10. Which of the following is a capability of Amazon CloudWatch Logs? (Select TWO.)(1 Point)

- ☒ Record AWS Management Console actions and API calls.
- ☐ Create alarms that automatically stop, terminate, reboot, or recover your EC2 instances.
- ☒ Monitor application logs from Amazon EC2 Instances.
- ☐ Store your log data at absolutely no charge.
- ☐ Adjust the retention policy for each log group.

11. What are the benefits of using Edge locations in AWS? (Select TWO.)(1 Point)

- ☐ Provides highly scalable object storage for your static content
- ☒ Allows edge devices to act locally on the data they generate while still utilizing the cloud for management, analytics, and durable storage by seamlessly extending AWS to them.
- ☐ Provides caching which reduces the load on your origin servers
- ☐ Provides a user-friendly edge computing device that aids in data migration.
- ☒ Improves application performance by delivering content closer to your users

12. If you want to launch a new Amazon RDS database cluster to your VPC, Which among the options below can you use? (Select TWO.)(1 Point)

- ☒ AWS Management Console
- ☒ AWS CloudFormation
- ☐ AWS Systems Manager
- ☐ AWS Concierge
- ☐ AWS CodePipeline

13. In accordance with the AWS shared responsibility model, which of the options listed below is solely the customer's responsibility?(1 Point)

- ☐ Patching of the host operating system
- ☒ Awareness & Training
- ☐ Service and Communications Protection or Zone Security
- ☐ Configuration Management

14. Which one of the following accurately describes the Amazon Simple Storage Service? (Select TWO.)(1 Point)

- ☐ A hybrid cloud storage service
- ☐ A durable, high throughput file system
- ☒ A storage service with virtually unlimited space
- ☒ A highly durable object storage infrastructure
- ☐ A high-performance block storage service

15. What service provides the lowest-cost storage option for retaining database backups which also allows occasional data retrieval in minutes?(1 Point)

- ☐ Amazon EBS
- ☐ Amazon S3
- ☐ Amazon EFS
- ☒ Amazon S3 Glacier Flexible Retrieval

16. For an urgent project, you need to host a new Microsoft SQL Server database in AWS. To fulfill this requirement, which AWS services should you use? (Select TWO.)(1 Point)

- ☐ Amazon Redshift
- ☐ Amazon Aurora Backtrack
- ☒ Amazon Relational Database Service (Amazon RDS)
- ☐ Amazon Aurora
- ☒ Amazon EC2

17. A company is planning to adopt a hybrid cloud architecture with AWS. Which of the following options can they use to help them estimate their costs?

(1 Point)

- ☐ Consolidated Billing
- ☐ AWS Cost Explorer
- ☒ AWS Pricing Calculator
- ☐ Cost allocation tag

18. A business intends to migrate their application from an On-Demand EC2 instance to a Reserved EC2 instance to save money. If the hosted application will be used for more than three years, which of the following is the most cost-effective option?(1 Point)

- ☐ No Upfront Standard Reserved Instance pricing for a 1-year term that is renewed every year.
- ☐ All Upfront Convertible Reserved Instance pricing for a 1-year term.
- ☐ No Upfront Convertible Reserved Instance pricing for a 3-year term.
- ☒ All Upfront, Standard Reserved Instance pricing for a 3-year term.

19. Which of the following IAM identities is connected to the access keys used to manage your cloud resources through the AWS Command Line Interface (AWS CLI)?(1 Point)

- ☐ IAM Policy
- ☐ IAM Group
- ☒ IAM User
- ☐ IAM Role

20. In AWS, which of the following are considered regional services? (Select TWO.)  
(1 Point)

- ☐ Amazon Route 53
- ☐ AWS Security Token Service
- ☒ Amazon EFS
- ☒ Amazon EC2
- ☐ AWS Batch

21. If you need to launch a MySQL OLTP database that is highly scalable, which AWS service should you use?(1 Point)

- ☒ Amazon Aurora
- ☐ Amazon Redshift
- ☐ Amazon DynamoDB
- ☐ Amazon ElastiCache

22. Which of the following is correct about AWS's Developer support plan? (Select TWO.)(1 Point)

- ☒ Has access to the full set of Trusted Advisor checks
- ☒ Recommended if you have business and/or mission critical workloads in AWS
- ☐ No access to the AWS Support API
- ☐ Limited access to the 7 Core Trusted Advisor checks
- ☐ Full access to the AWS Support API

23. Amazon S3 is being used by a company to store static media, like photos and videos. Which one of the following is used to grant specific users access to the bucket?(1 Point)

- ☐ Security Group
- ☐ SSH key
- ☒ Network Access Control List
- ☐ Bucket Policy

24. Which of the following can a developer use to interact with your AWS services? (Select TWO.)(1 Point)

- ☐ Elastic Network Interface
- ☒ AWS Command Line Interface
- ☐ AWS Organizations
- ☒ AWS SDKs
- ☐ AWS Artifact

25. Which of the following is a key use case of AWS Control Tower?(1 Point)

- ☐ A way for customers to send instructions on how to deploy popular technologies like WordPress to an AWS account.
- ☐ A quick monitoring engine that checks to see if any of your AWS accounts deviate from AWS best practices.
- ☒ An easy way to establish a landing zone that implements an AWS well-architected, multi-account environment and applies the AWS best practices.
- ☐ A centralized logging service for all types of log files.

26. A company is currently deciding which AWS Region would be best for migrating its applications. Which of the following should they take into account? (Select TWO.)(1 Point)

- ☒ Enhance customer experiences by reducing latency to users.
- ☐ Potential volume discounts for the specific AWS Region.
- ☒ Proximity to your end-users for on-site visits to your on-premises data center.
- ☐ Availability Zone Security.
- ☐ Support country-specific data sovereignty compliance requirements.

27. To consolidate billing across multiple AWS accounts and centrally manage account policies, which service should a company use?(1 Point)

- ☐ AWS Cost Explorer
- ☐ AWS Trusted Advisor
- ☒ AWS Organizations
- ☐ AWS Budgets

28. Which of the following enables you to import data about your AWS costs and usage into Amazon Athena, Amazon Redshift, AWS QuickSight, or a tool of your choice in addition to providing you with the most granular data?(1 Point)

- ☒ AWS Cost and Usage Reports
- ☐ Consolidated Billing
- ☐ AWS Budgets
- ☐ AWS Cost Explorer

29. Which of the following components of the AWS Global Infrastructure is comprised of one or more distinct data centers, each with redundant power, networking, and connectivity and housed in separate facilities?(1 Point)

- ☐ VPC
- ☐ Edge location
- ☒ Availability Zone
- ☐ AWS Region

30. Which of the following allows you to categorize and track your AWS costs on a detailed level?(1 Point)

- ☐ Amazon Aurora Backtrack
- ☐ AWS Budgets
- ☐ Consolidated Billing
- ☒ Cost allocation tags

31. By letting you use your existing server-bound software licenses, which of the following Amazon EC2 instance purchasing options can help you meet compliance requirements and cut costs?(1 Point)

- ☐ On-Demand Instance
- ☐ Dedicated Instance
- ☒ Reserved Instance
- ☐ Dedicated Host

32. Which kind of Elastic Load Balancer uses WebSockets to support path-based routing, host-based routing, and two-way communication channels?(1 Point)

- ☒ Application Load Balancer
- ☐ Gateway Load Balancer
- ☐ Network Load Balancer
- ☐ Classic Load Balancer

33. What is the minimum number of Availability Zones that you should set up for your Application Load Balancer in order to create a highly available architecture?(1 Point)

- ☐ 1
- ☐ 4
- ☒ 2
- ☐ 3

34. What should you provide to your developers so that they can use the AWS CLI to access your AWS services?(1 Point)

- ☒ SSH keys
- ☐ API keys
- ☐ Access keys
- ☐ IAM username and passwords

35. Which of the following best describes what CloudWatch can be used for? (1 Point)

- ☒ An audit service that records all API calls made in your AWS account
- ☐ An automated security assessment service
- ☐ A repository for metrics and logs
- ☐ A repository for compliance rules

36. In AWS, \_\_\_\_\_ is one of the advantages of Consolidated Billing. (1 Point)

- ☒ Consolidation of both AWS and AISPL accounts into one billing.
- ☐ Volume pricing.
- ☐ Go global in minutes.
- ☐ The ability to have one member account to pay the charges of all the master accounts.

37. Which of the following are false regarding Amazon Relational Database Service (Amazon RDS)? (Select TWO.) (1 Point)

- ☐ Automatically scales up the relational database instance size based on the incoming workload
- ☒ Provides 99.9999999999% reliability and durability
- ☐ It is a fully managed relational database service
- ☐ Makes it easy to set up, operate, and scale a relational database
- ☒ Simplifies the management of time-consuming database administration tasks

38. Which of the following is true on how AWS lessens the time to provision your IT resources?(1 Point)

- ☐ It provides an AI-powered IT ticketing platform for fulfilling resource requests.
- ☐ It provides various ways to programmatically provision IT resources.
- ☐ It gives you an automated way to ask for and get IT resources from third-party vendors.
- ☐ It offers express delivery to expedite the delivery of your servers to your data centers.

39. Utilizing managed services like RDS, ElastiCache, and CloudSearch in AWS offers which of the following advantages?(1 Point)

- ☐ Better performance than customer-managed services such as EC2 instances
- ☐ Simplifies all of your OS patching and backup activities to help keep your resources current and secure
- ☐ Automatically scales the capacity without any customer intervention
- ☒ Frees up the customer from the task of choosing and optimizing the underlying instance type and size of the service

40. A company intends to launch a new system on Amazon Web Services (AWS), but it lacks an employee with AWS expertise. Which of the accompanying AWS channels can rather assist the organization with planning, planner, fabricate, relocate, and deal with their jobs and applications on AWS?(1 Point)

- ☐ AWS Partner Network Technology Partners
- ☐ AWS Marketplace
- ☒ Technical Account Management
- ☐ AWS Partner Network Consulting Partners

41. Which two services are used to protect the VPC and can be found in the AWS Console's VPC dashboard? (Select TWO.)(1 Point)

- ☐ CloudFront
- ☒ Network ACLs
- ☐ Lambda
- ☒ Security Groups
- ☐ Route 53

42. Chairros International Ventures has been hired by a company to design an AWS disaster recovery solution for their on-premises SQL databases and bare metal servers. The implementation must be reliable, quick, and easy to use. Additionally, it should also prevent any kind of data loss. The company would like to monitor the migration's progress. For the DR solution, which tool ought the team to use?(1 Point)

- ☒ AWS Migration Hub
- ☐ CloudEndure
- ☐ AWS Server Migration Service
- ☐ AWS Database Migration Service

43. Which of the following can you use to fix the connection between your AWS virtual private cloud and your on-premises VPN? (Select TWO.)(1 Point)

- ☒ NAT Gateway
- ☒ Virtual Private Gateway
- ☐ Amazon Route 53
- ☐ Egress-Only Internet Gateway
- ☐ VPC Peering

44. You need to launch a new EC2 Instance for a beta program which is scheduled to change its instance family, operating system and tenancy exactly 3 months after its trial period. Which type of Reserved Instance (RI) should you use? (1 Point)

- ☐ Zonal RI
- ☒ Scheduled RI
- ☐ Standard RI
- ☐ Convertible RI

45. Which of the following is true regarding Elastic Load Balancing? (1 Point)

- ☐ It automatically increases or decreases the number of instances as the demand of your application changes.
- ☒ It translates domain names (such as [www.amazon.com](http://www.amazon.com)) into numeric IP addresses (such as 54.239.28.85) that Amazon EC2 instances use to connect to each other.
- ☐ It distributes incoming application traffic across multiple targets, such as Amazon EC2 instances, in multiple Availability Zones.
- ☐ It is a virtual server that allows you to run your applications in the AWS Cloud.

46. If you want to store data that is changing quickly and has low read and write latencies, which AWS services should you use? (Select TWO.) (1 Point)

- ☐ Amazon AppStream 2.0
- ☐ AWS Snowball
- ☐ Amazon RDS
- ☒ Amazon S3
- ☒ Amazon EBS

47. Which option for purchasing Amazon EC2 instance lets you take advantage of unused EC2 capacity in the AWS Cloud and provides up to a 90% discount compared to On-Demand prices?(1 Point)

- ☐ Standard Reserved Instance
- ☐ Spot Instance
- ☒ Dedicated Host
- ☐ Convertible Reserved Instance

48. Which AWS service enables the automatic scaling of your EC2 compute capacity in response to incoming traffic?(1 Point)

- ☐ Amazon Lightsail
- ☐ AWS Auto Scaling
- ☐ AWS CloudTrail
- ☐ Amazon Macie

49. Which of the following Cost Management Tools enables you to view the discounted RI rate that was applied to your resources and track your Amazon EC2 Reserved Instance (RI) usage?(1 Point)

- ☒ AWS Cost and Usage report
- ☐ AWS Budgets
- ☐ AWS Cost Explorer
- ☐ AWS Price List Bulk API

50. If you need access to the AWS Support API for programmatic case management, which of the following AWS Support Plans is the most cost-effective?(1 Point)

- ☐ Basic
- ☒ Developer
- ☐ Business
- ☐ Enterprise

51. Which of the following enables you to set coverage goals and receive notifications when utilization falls below a predetermined threshold?(1 Point)

- ☐ AWS Trusted Advisor
- ☒ AWS Budgets
- ☐ AWS Cost Explorer
- ☐ Amazon CloudWatch Billing Alarm

52. Which among the options below is a highly available and scalable cloud Domain Name System (DNS) web service in AWS?(1 Point)

- ☐ Lightsail
- ☐ Active Directory Domain Service
- ☐ Rekognition
- ☒ Route 53

53. Which of the following below are the benefits of using Consolidated billing in AWS? (Select TWO.)(1 Point)

- ☐ Allows one member account to pay the charges of all the master accounts
- ☒ Consolidate together the billing and payment of both AWS accounts and Amazon Internet Services Pvt. Ltd (AISPL) accounts
- ☐ Share the volume pricing and Reserved Instance discounts by combining the usage across all accounts in the organization
- ☐ Consolidated all the bills from multiple AWS accounts for only \$1 every month
- ☐ You get one bill for multiple accounts

54. Which of the following options is included in AWS Trusted Advisor's five categories for analyzing your AWS environment and providing recommendations for best practices? (Select TWO.)(1 Point)

- ☐ Storage Capacity
- ☐ Fault Tolerance
- ☐ Infrastructure
- ☐ Instance Usage
- ☐ Performance

55. A customer intends to move some of their on-premises web applications to Amazon Web Services (AWS). Which of the following is an advantage of using AWS over virtualized data centers?(1 Point)

- ☐ Higher variable costs and higher upfront costs.
- ☐ Higher variable costs and lower upfront costs.
- ☐ Lower variable costs and higher upfront costs.
- ☐ Lower variable costs and lower upfront costs.

56. Which of the following services can look over your AWS environment and suggest ways to cut costs, boost system performance and dependability, and cover security gaps?(1 Point)

- ☐ AWS Inspector
- ☐ AWS Budgets
- ☐ AWS Trusted Advisor
- ☐ AWS Cost Explorer

57. To improve application performance, which of the following services is best suited for storing the results of I/O-intensive SQL database queries?(1 Point)

- ☐ Amazon ElastiCache
- ☐ Amazon DynamoDB Accelerator (DAX)
- ☐ AWS IoT Greengrass
- ☐ Amazon CloudFront

58. If you need a non-relational database service that is scalable, quick, and adaptable, which one should you use?(1 Point)

- ☐ Amazon Redshift
- ☐ Amazon RDS
- ☐ Amazon S3
- ☒ Amazon DynamoDB

59. To deploy, test, and enhance their AWS environment, a company with a basic support plan requires additional resources. Which of the following is free for them to use?(1 Point)

- ☒ AWS online documentation, whitepapers, blogs and support forums
- ☐ In-person classes with an accredited AWS instructor
- ☐ AWS Support API for programmatic case management
- ☐ Technical Account Manager consultation

60. A company has a hybrid cloud architecture where their on-premises data center interacts with their cloud resources in AWS. Which of the following services in AWS can you use to deploy a web application to the servers running on-premises? (Select TWO.)(1 Point)

- ☐ AWS Elastic Beanstalk
- ☒ AWS OpsWorks
- ☐ AWS Batch
- ☐ AWS CloudFormation
- ☒ AWS CodeDeploy

61. Which of the following is one of the most important financial advantages of migrating systems hosted on your on-premises data center to AWS?(1 Point)
